Assistant Teaching Professor in Business Analytics, Operations Management and/or Information Systems

The School of Business at the University of Kansas is searching for an Assistant Teaching Professor in Business Analytics, Operations Management and/or Information Systems. All interested candidates should demonstrate their industry and/or teaching expertise in the areas of analytics, supply chain management, and/or information systems to contemporary business problems. This is a full-time, non-tenure, academic-year teaching position beginning January 1, 2025. The initial appointment for the Assistant Teaching Professor will be for three academic years. KU's excellence is a result of the rich tapestry of experiences, perspectives, and backgrounds of our faculty, staff, students, and colleagues from across our nation and the globe. At KU, we invest in continuous learning and growth by creating a climate where people engage in respectful dialogue and debate and support each other's success. We foster a culture of care where each person is seen, heard and valued. When people feel a true sense of belonging, we believe they are better able to reach their full potential and achieve remarkable things. The successful candidate must be eligible to work in the U.S. by the effective date of the appointment.

Job Duties 80% Teaching: Teach undergraduate or graduate level courses in various topics in statistics, information systems, supply chain management, and/or business analytics. Duties include but are not limited to course preparation, consultation, and assignment of course grades. Courses may be taught at the Lawrence, Edwards, or Leavenworth campus or online. The course load for this appointment is four courses each semester (fall and spring). Course load and teaching assignments will be determined by the area director to best meet the needs of the School of Business. All teaching professors should abide by area, school, and university policies and procedures.10% Service: Participate as an active member of the area and engage in instruction-related activities beyond direct instruction. Examples include curriculum development committees, course improvement initiatives, and advising student organizations. All faculty members are expected to fulfill their share of service duties needed to facilitate the efficient operation of the school. 10% Scholarly and/or industry engagement: Engage with practitioners in the business community to better understand current and evolving business practice and disseminate this knowledge within or outside the school to improve instruction and student development. Dissemination may take many forms, including but not limited to presentations or workshops for colleagues, participation on curriculum committees, case study, and case competition development. If desired, scholarly engagement may also include academic or pedagogical research, publications in academic or practitioner journals or textbook development. *Ad also contained application instructions*

Required Qualifications:
1. A Ph.D. or D.B.A in business analytics, operations management, information systems, or a related field (e.g., data science, data engineering, data management, predictive analytics, information science, information systems, applied statistics, computational science, or quantitative social science). Degree must be earned by January 1, 2025.
2. Demonstrated (or high potential for) teaching excellence in information systems, supply chain, and/or business analytics.
3. Demonstrated (or high potential for) scholarly or industry engagement.
