

Retirement Readiness Q3, 2023:

Let us help you pursue your goals

Give your retirement plan a raise: Saving more for retirement is a smart money move with many benefits

Has your paycheck increased over the years? Have your living expenses changed? If so, consider contributing more to your Voluntary Retirement Plan.

- This may help you avoid paying more in current taxes. That's because any pretax contributions you make are deducted from your salary before income taxes are calculated.
- There are more funds working for you because contributions and earnings are not taxed until you withdraw your money.*

Saving a little now could make a big difference later. The chart shows what happens when a person earning \$40,000 a year contributes 3% or 4% of their salary over a period of time.

Starting salary: \$40,000	Total savings after 5 years	Total savings after 15 years	Total savings after 25 years
3% salary contribution	\$7,389	\$34,624	\$90,756
4% salary contribution	\$9,852	\$46,165	\$121,008

This illustration assumes annual raises of 3%, that contributions earn a hypothetical 6% annual return and that contributions are made at the beginning of each month, compounded monthly and reinvested. This illustration is not meant to predict or project performance. Does not include any withdrawals, fees or taxes that would reduce performance. Actual returns will vary.

To enroll or increase your contributions you must complete the Investment Agreement available through your HR/Benefits Office.
